

## JOHNSON

Miss Ida Perry is visiting relatives in Concord, N. H.

Rev. E. G. French of Hardwick was in town Saturday.

Miss Marjorie Hayford is to teach at North Cambridge.

Dr. R. G. Prentiss and family were in Burlington Sunday.

The schools all take a recess Tuesday, it being Columbus Day.

Miss Josie Drown was home from her school in Brockton, Mass., last week.

Mrs. Edward Parker is visiting her sister, Mrs. Harry Broadwell, in Barre.

Mrs. E. A. Camp of Barre, who has visited her cousin, Mrs. J. L. Pierce, has returned home.

W. A. Landon and family of South Hero were guests at O. A. McFarland's the first of the week.

Tom Leland and family of Waterbury visited his sister, Miss Lizzie Leland, the first of the week.

The Principal of the Training School, Mrs. H. B. Woodward, is in Burlington for a day or two.

Misses Etta Waters, Madeline McCuin and Muriel Peck were home from their schools for the week-end.

Mr. and Mrs. Phillip Chase and son, Harold, of Chicago recently visited the latter's cousin, Mrs. Bert Mills.

Miss Alice Fay of the Normal faculty passed the first of the week with Mr. and Mrs. George Fowler in Stowe.

A Club Tea will be given Thursday afternoon from 2 till 5 by Mrs. Persis McFarland, Mrs. Emilie Parks, Miss Edith Leslie.

Mrs. May Wilson and son, Max Wilson, and Mr. and Mrs. Oscar Larabee of North Troy have been guests of Mrs. J. L. Pierce.

D. A. Barrows is away on a business trip and his family are passing the time in Orleans with her brother, Charles Stevens.

Rev. William Hazen, brother of Rev. F. W. Hazen, who is a missionary in India, preached in the Cong'l church Sunday morning.

Miss Emma Dodde, the nurse who has been caring for Miss Mabel Austin, returned to Burlington Monday, leaving the patient quite comfortable.

Wm. Baker has sold his home place, formerly the R. H. Bradley residence, near the railroad station to Carroll Munn and has bought the Seth Lyon farm, formerly the James Parker farm, on Johnson Plain.

The first meeting of the Oread Literary Club for the year was held Thursday evening, Oct. 7, at the Library. Mrs. Mattie Baker conducted the meeting. The roll call was responded to by names of birds seen in town, birds being the subject. Mrs. Baker read a paper on "Vermont Birds—harmful, helpful. How to attract more useful birds," which was much enjoyed. Mrs. H. A. Barrows and Mrs. McFarland gave short readings and remarks on the subject. Miss Emma Elliott gave the current events. The attendance was good and a most interesting meeting was enjoyed.

## Mrs. Lucy A. Grow

The following is taken from the Boston Globe of Sept. 7:—

The oldest native of Johnson, Vt., is Mrs. Lucy Ann Grow, who lives on a farm with her son, Lemuel R. Grow, and family, in the house where she has resided for more than 50 years.

She was born in Johnson Aug. 28, 1822, and with the exception of a short time spent in Derby, Vt., has always lived in her native town. She was married at 20 to Leland H. Grow of Derby, who died 14 years ago. Four sons were born to them, one of whom, Eugene P., died last week in Johnson. The others are Henry P. of Fort Jackson, N. Y., and Lemuel R. and Clarke S. of Johnson.

Mrs. Grow has until very recently enjoyed remarkably good health and is now able to be about the house every day. Her hearing is practically unimpaired and she has always been able to read without glasses. The three sons have always lived on adjoining farms and for years a feature of the Thanksgiving dinners enjoyed by the united families has been the chicken pie, which are always made by "Grandma" Grow. The children, grandchildren and great-grandchildren are in hopes that she will be able to take part in the event again this year.

## ALL TIRED OUT

## Hundreds More in Morrisville in the Same Plight.

Tired all the time;  
Weary and worn out night and day;  
Back aches; head aches,  
Your kidneys are probably weakened.  
You should help them at their work.  
Let one who knows tell you how.

John M. Miles, 28 Main St., Morrisville, says: "For two or three years I suffered from attacks of backache. During these spells the kidney secretions were irregular in passage and unnatural. This weakness kept me from getting my proper rest. In the morning I was dull and worn-out. After trying various medicines without success, I began using Doan's Kidney Pills, procured from Cheney's Drug Store. Two boxes improved my condition in every way."

STEADFAST CONFIDENCE.  
OVER TWO YEARS LATER, Mr. Miles said: "I still use Doan's Kidney Pills once in awhile and they always act as represented."

Price 50 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Miles has twice publicly recommended. Foster-Milburn Co., Proprietors, Buffalo, N. Y.

## Lay-to for a spell and swing on this:

You'll start an old-pal-party via a pipe or a makin's cigarette quick as a flash, as soon as you realize it's a live bet to let your good money rub up against some Prince Albert tobacco. Why, it's like beating back to the bushes for old-home week, P. A.'s so friendly, so chummy-like.

You see, Prince Albert lets you hear the song of the joy-us jimmy pipe and the makin's cigarette all the day long! The patented process takes care of that—and cuts out the bite and parch!

## PRINCE ALBERT

the national joy smoke

just hands you home-made questions like these:

Were you ever pipe-happy? Did you ever hit a brand that just pushed pleasure against your palate? The kind that sort of teased your smokeappetite for some more fire-up, then another—and so on, right to the pillow-period!

Well, that's P. A., no matter how you hook it up—pipe or cigarette. *It just-jams-joy into your system!* You nail that fact hot off the bat, because it's case-cards information! And handed out to you for *personal and immediate* attention as being about as real and true as you've heard since Hector was a pup!

P. A. is sold in the tippy red bag for the price of a jitney ride, 5c; tidy red tin, 10c; pound and half-pound tin humidors—and—the classy pound crystal-glass humidor with the sponge-moistener top that's not only a joy-us thing to have at home and at the office, but it keeps P. A. in the highest state of perfection.

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

Here is Casimiro Irado, 104 years old, who lives in Watsonville, Cal. He has a remarkable memory and clearly recalls the war in Spain in 1822, when he was a lad of 12 summers. Irado has been a smoker all his life, and today he seeks no dealer, no truer friend than his old jimmy pipe. Irado has just been elected a member of the Prince Albert "old-time jimmy-pipers club."

## His Immediate Necessity.

"That poet looks as if he were longing for the wings of a bird."  
"Huh! He'd be tickled to death with the neck of a chicken."—Houston Post.

Horse Is Most Nervous Animal.  
Remember that the horse is the most nervous of all animals, and that little things annoy and irritate him. He will be contented or miserable according as you treat him.

## Wouldn't Be Bullied.

Lord Kitchener, celebrated for his stern and exacting manner, met his match on one occasion and proved the fine quality of his nature by acknowledging the fact.

It was in the days when the railway was being driven across the desert to Khartum. A young Canadian officer of engineers was in charge of the work, which was progressing satisfactorily, when one morning the sirdar (as Kitchener then was) appeared on the scene and expressed his disapproval of certain features of the work with his usual bluntness.

The young officer listened until his chief had finished and then quietly inquired:

"Am I bossing this railway, sir, or are you?"

Kitchener gave him a quick glance, recognized him as one of his own sort, nodded approval and went away.

Self Help in Case of Fire.

As a house is never attacked by fire at the top and bottom at once, if there is a safe and ready exit at both top and bottom very little danger to life is to be feared. It is important that all exits should be so known as to be easily found by day or night by every inmate of the house. If the clothes you have on catch fire a blanket, rug or some such woolen article should be quickly and tightly wrapped around you. Air is thus excluded, and the fire goes out. A small fire in a room can often be put out in the same way in preference to pouring water on it. In case of fire keep all doors shut as far as possible. If a room is full of smoke keep low or crawl, because smoke and hot air both rise.

Dangerous Situation.

"Awful situation at the jail."  
"Dear me! What is it?"

"They have the measles there, and all the prisoners have broken out."—Baltimore American.

The youth who does not look up will look down and the spirit that does not soar is destined perhaps to grovel.—Disraeli.

## LIVE STOCK

## HOW TO RAISE ORPHAN COLTS

Feet May Be Raised on Cow's Milk in Case of Accident—Attendant Must Be Patient.

(By W. S. ALEXANDER, Wisconsin Experiment Station.)

In case the mare dies or has no milk the foal may be raised on cow's milk, if the attendant conducts the work patiently and intelligently. Choose the milk of a cow that has recently calved, preferably one which gives milk low in butterfat, as mares' milk, while rich in sugar, is poor in fat. Sweeten the milk with molasses or sugar and dilute with warm water. Give a little of this prepared milk at short intervals from a scalded nursing bottle and large rubber nipple. Be careful to keep the bottle and nipple scrupulously clean. Add an ounce of lime water to each pint of the prepared milk and allow half a cupful once an hour at first.

As the foal grows, gradually increase the amount of milk fed and lengthen the intervals between meals. In a few days food may be given six times a day and, later, four times daily. The foal will soon learn to drink from a pail, if allowed to suck the attendant's fingers at first.

Until the bowels move freely give rectal injections night and morning. If the foal scours at any time give two to four tablespoonfuls of a mixture of sweet oil and pure castor oil shaken up in milk, and stop feeding milk for two or three meals, allowing sweetened warm water and lime water instead. Let the foal lick oatmeal as soon as it will eat and gradually increase the amount and add wheat bran. In five or six weeks some sweet skim milk may be given and the amount gradually increased daily until, in three months or so, it may be given freely three times a day in

## Teaching a Colt to Take an Apple.

place of new milk. The foal at this age also will be eating freely of grass, grain and bran.

## HOGS SUBJECT TO DISEASES

Mange Is Difficult to Eradicate Because of the Burrowing Habit of the Parasites.

(By M. H. REYNOLDS, Minnesota Experiment Station.)

Hogs are subject to a variety of skin diseases. Two of these, although quite different, are both known as mange.

Pitch mange is not a true mange, but rather an eczema, and affects hogs that are not in vigorous health and when kept in filthy pens and bad surroundings. Light-skinned hogs appear somewhat more susceptible to this than others. The skin is at first red and perhaps swollen. Small red spots appear and subsequently change to blisters, which dry and form crusts. The main treatment needed is simple cleanliness and the sort of feed that will make the hog healthy and vigorous. It usually means a complete change of surroundings and plenty of good food.

Hogs are subject also to true mange. This is caused by a minute animal parasite which burrows into the skin like the human itch mite and causes severe inflammation and itching. This form of mange is especially difficult to treat because of the burrowing habit of the parasite. Mange begins somewhere on the head or neck and extends slowly backward. The hams are likely to be affected sooner or later. The bristles fall out, and the skin becomes very thick and wrinkled. Sometimes it is thickened to an astonishing extent. Hog mange is peculiar on account of the powderlike surface of the crust.

## Horse Care.

Don't whip the horse if he is afraid. Talk gently to him. Don't forget his salt. Don't put a rough, dirty bit in his mouth, nor a frosty one. Don't hitch him in the cold unprotected by blankets, and hitch him so the wind will not be in his face. Notice how horses in a lot always turn tail to a cold wind. Give him enough to eat of good, wholesome food, and all the good water he wants.

## Buy It Now

Farmers must start the ball of prosperity rolling. It's up to them. Let them buy now the things they most need. This will very shortly solve the problem of the unemployed. The country can save the city. Thousands of families are suffering this winter. Are you going to help? Do it for humanitarian reasons if for nothing else.
